

# DIVE BOMBER

# DIVE BOMBER

The dream of every child is to fly their own plane and the DIVE BOMBER fits the bill. The 6 classic style planes hold 4 children or 2 adults and 2 children in each plane. With all 6 planes loading at the same time the DIVE BOMBER has a great capacity to carry loads of children and their parents.

This great looking kid ride has a smooth octopus type action. To start this action the operator starts the center turning. The center then rises with a single hydraulic cylinder. The planes climb into the air one after the other just like in the movies. Next the center oscillating action starts to turn causing the planes to zoom up toward the sky and swoop down toward the ground. The super smooth action of this ride is fun and exciting for children of all ages.

Moving the DIVE BOMBER is quick and easy. The entire ride loads on the trailer-mounted center in just 1 hour with 2 people. The 6 fiberglass planes load on the trailer; the sweeps fold up, and then load the fence, making this one of the fastest moving rides in the business. The ball hitch tandem axle trailer pulls behind a pickup making this ride great for picnic operations.

The park model can also be easily installed indoors or out for a super attraction at parks everywhere. Every child will love to be the master of the sky on this beautiful high capacity kid ride.

New for 2003 is a 28' single axle trailer and platform option. The trailer lets down to the ground, the wings fold down and a gorgeous European style is ready to operate. The 28' trailer allows towing and thus, load behind.

## SPECIFICATIONS:

<b>DIMENSIONS</b>	35' Wide 35' Deep 14' High Total space and height required	<b>POWER REQUIREMENTS</b>	1-1 1/2 HP 110 Pump	<b>CAPACITY SEATING</b>	4 Passenger/Car 24 children 12 Adults and/or Children
