

DRAG STRIP

The most popular attraction at any park or midway has always been the slide. The low maintenance and high profit margin make it an instant hit with owners.

Wisdom has designed one of the largest most attractive slides available. The *Drag Strip* is a modern version of the Giant Slide which is larger, flashier and easy to move.

This makes our slide an ideal choice for anyone who wants a high-grossing easy to move piece to fit into their lineup. Kids and adults love the thrilling speed which means once is never enough, and that translates into more profits for you.

The eight lane *DRAG STRIP SLIDE* is mounted on two 53 foot trailers and sets up in 10 - 12 hours with 4 men. The two trailers mate together hydraulically and then the upper and lower 50 foot section rolls off each end of the trailer. Once the side by side panels are connected together the center section lifts raising the end of each section. The high end is raised with a hydraulic winch.

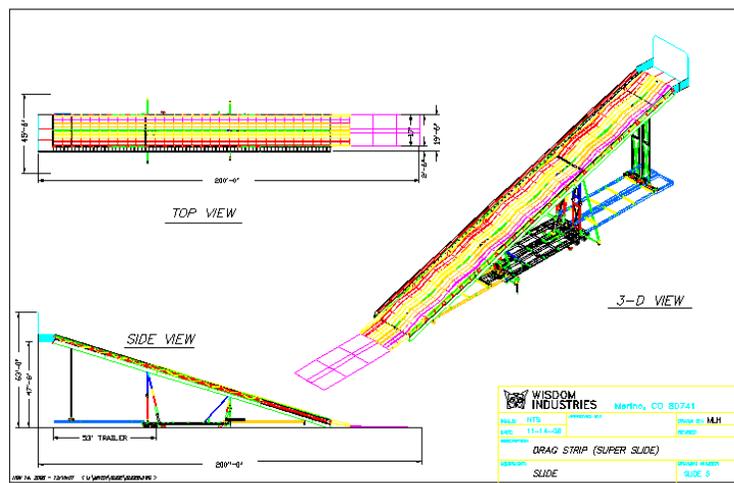

The steps and side walls fold out quickly. Hang the light standards and 20-1500 watt quartz lights and start raising the slide.

The *DRAG STRIP* has a great looking back wall with running lights and vacuformed sign.

The slide has 12-7 ½ KW heaters mounted under the fiberglass to take care of the condensation for reliable day and night operation.

There is no easier way to move a better looking slide in the industry.

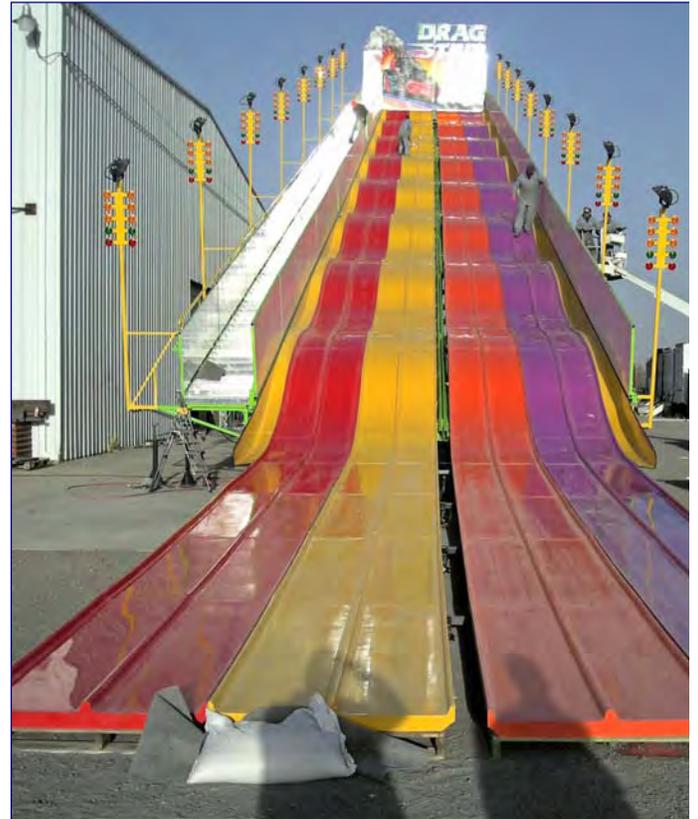

DIMENSIONS			POWER REQUIREMENTS	CAPACITY
Ride	205' long x 40' wide x 63' tall Total space and height required 225' required for set up	Set up power	15 HP 3 Phase Motor 10 KW Running Lights	1000-1500 Per Hour
Trailer	2 Trailers 53' long x 8'6" wide x 13'6" tall 1 trailer 50,000 lbs. 1 trailer 60,000 lbs.	Electrical	20-1500 watt quartz lights 12-7 ½ KW heaters	130 Amps 208 Volts 3 Phase Total Power
